The bold letters represent the noun classifier endings. * When suffixes, such as **-an**, **-un** follow nouns, ending in a vowel or **-r**, **-g** is inserted between the noun stem and the suffix, however, there are few exceptions with loan words, e.g., *tebilgan*, not *tebilan* as one would expect.

i Note that non-referential nouns, such as time words, are unmarked for definiteness.

Notes on noun inflection

i When the stem ends with a consonant and the suffix starts with a consonant, -o will be inserted. When the stem ends with a vowel and the suffix starts with a vowel, -y is inserted. Examples:

- ▶ šohor + -r → šohoror
- ▶ fuwa + -e → fuwaye

i When the noun stem ends with the glides **ai** and **ou**, the consonants **-y** and **-w** will be inserted between the noun stem and the case marker, respectively. Because of syllable constraint, -o is inserted before the case marker. Examples:

- ▶ báí + r → báiyor "brother's"
- ▶ bou + r → bouwor "wife's"
